“The CMA qualification has not only helped me clarify fundamental concepts but also provided in-depth knowledge of financial accounting, cost accounting, financial management, and related reporting. This comprehensive understanding has been instrumental in formulating policies to strengthen internal controls.

I would advise ICMA students to focus not only on understanding the core concepts of accounting and financial management but also on keeping themselves updated with the latest tools and techniques in the field. Moreover, they should actively seek opportunities for practical training to sharpen their skills and bridge the gap between theory and practice.”
